HAND TOOL

SUPER

CATALOGUE NO 655

Strong, and easy in handling ! SUPER tools

We are very happy to have a chance to show you our products.
We hope that this catalogue will give you a good advice when you want to buy the tools.

In daily life we owe to a lot of merchandises. It is true that everyone wants to buy the excellent. Aren't you disappointed at finding that it was not what you ware wanting after getting it ?

When you are going to buy a tool, you must not forget to find "JIS" mark on it. And also you must be careful not to be affected with propaganda.

"JIS" means Japan Industry Standard, having been acted since July, 1940. This mark is given the tool which was appreciated its real worth and was recognized its capability to be continueous by Japanese Government.

Most of our products of Super mark have JIS mark, and We are proud of them.

It is lucky for you to use "Super."

SUPER ..... garanteed by "JIS"

SUPER ..... selected by nations

SUPER ..... producted by expert

"Super" tools, we are very sure, satisfy you, because they are excellent one producted with our good experience and high technique through constant study.

ADJUSTABLE ANGLE WRENCH

material : vanadium alloy steel
type : 23° heavy
special feautures: wrmgear & pin doesn't fall off because we gave the post of screw-rotarion special invention.
Size: 6″ 8″ 10″ 12″ 15″ 18″

SLIP JOINT PLIER

material : vanadium alloy steel or carbon steel.
All drop forged. nickel chrome plated.
Size : 6″ 8″

GAS WATER PUMP PLIER

Give the special device in the shape of handle to be used for electric conduit work and the end of haudle is utilized as the subsititution of driver.
Size : 10″

GRIP PLIER

Special feautures :

1. Large circle
   0～50㎜ for bar 0～40㎜ for angle you can adjust it easily and smoothly.
2. Strong power maximun 1 ton
3. Material
   We use vanadium alloy steel at the edge, so it hardly wears out. (H. R. C 48°～58°)

Length : 9″

SUPER TONG
(CHAIN WRENCH)

Special features

1. This is for the round, the hexagonal and the square.

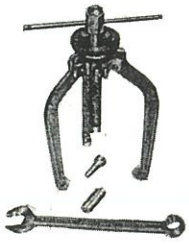
SUPER SHOCK PULLER



Everybody knows the fact that it is very difficult work to take off wheels, puller-gears, which are rusted or sheared to the shaft.
In order to take off these, it would be the best to take both way of giving strong pressure of screws and effective shocks.

Our shock sheed puller was completed by using above both methods to its high efficiency. The material of this Puller is chrome-plated on vanadium alloy steel.

Stock No. SSP—5 SSP—8 SSP—12

POWER PUSHER

By using Super Power Pusher, operation will be proceeded very smoothly, as auxilliary toods, in all kinds of drawing works. Especially,
1/20 to 1/30 labour will be saved in the operation by jointly using Power Pushers, when the pressure comes up to the limit of Gear Puller at the time of drawing axes receptacles.

Weight : 1.4*kg* liftage 12*m/m* pressmoment 8ton
